## DETAILED ACTION

### *Drawings*

The subject matter of this application admits of illustration by a drawing to facilitate understanding of the invention. Applicant is required to furnish a drawing under 37 CFR 1.81. No new matter may be introduced in the required drawing.

### *Specification*

The use of the trademark FRISBEE has been noted in this application. It should be capitalized wherever it appears and be accompanied by the generic terminology.

Although the use of trademarks is permissible in patent applications, the proprietary nature of the marks should be respected and every effort made to prevent their use in any manner which might adversely affect their validity as trademarks.

### *Claim Objections*

Claims 1-3 (amended), 11, 18, and 21 are objected to because of the following informalities:

Claim 1 (amended), line 9, delete "the".

Claim 2 (amended), line 2, after "...annular flange..." insert -portion--.

Claim 3 (amended), line 4, after "...annular sidewall..." delete "portions" and insert -portion--.

Claim 11, line 5, after "...annular flange..." insert -portion--.

Claim 11, line 8, after "...said disc..." insert -toy--.

Art Unit: 3712

Claim 18, line 2, delete "sidewalls" and insert -sidewall--.

Claim 21, line 1, after "...said disc..." insert -toy--.

Appropriate correction is required.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 6-8 (amended), and 11-21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 6 (amended) recites the limitation "said re-enforcing member" in lines 1 and 2. There is insufficient antecedent basis for this limitation in the claim.

Claim(s) 7, 8 (amended), 13, 16, and 18-21 depend from rejected claim(s) 6 (amended) and 11, respectively, and include all of the limitations of claim(s) 6 (amended) and 11 thereby rendering these dependent claim(s) indefinite.

Claim 11 recites the limitation "said portions" in line 6. There is insufficient antecedent basis for this limitation in the claim.

Art Unit: 3712

Claim 11 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The limitation "...said toy capable of being thrown with said top portion uppermost..." in lines 9 and 10 is unclear.

Claim 12 recites the limitation "said pet's mouth" in lines 2 and 3. There is insufficient antecedent basis for this limitation in the claim.

Claim 14 recites the limitations "the surface", and "said annular sidewalls" in lines 2 and 3. There is insufficient antecedent basis for these limitations in the claim.

Claim 15 recites the limitation "said pet's oral health" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim 17 recites the limitation "said rubber disc" in line 2. There is insufficient antecedent basis for this limitation in the claim.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-8 and 11-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent No. 6,383,052 B1 to McCarthy in view of U.S. Patent No. 6,174,214 B1 to Cooper.

McCarthy discloses the claimed invention except for thread fabric being continuously disposed within the top, sidewall and flange portions of the disc. However, Cooper teaches a flying disc comprising fabric layers (20, 22) bonded to the upper and lower surfaces of the disc core to improve the flexibility, strength, and durability of the disc. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the disc of McCarthy, in view of Cooper, such that it would provide the disc of McCarthy with thread fabric in place of the plate (40) of the disc of McCarthy (see fig.18), for the purpose of reinforcing the disc.

### ***Response to Arguments***

Applicant's arguments with respect to claims 1-10 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 3712

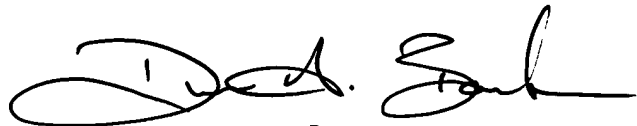

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
